Cisco CCNP Enterprise	Fortinet NSE 7 Network Architect	Check Point CCSE Expert	Palo Alto PCNSE Engineer
HPE Aruba ACSA / ACSE	Microsoft Azure AZ-900	Cisco CCNA	Fortinet NSE 5

PROFISSIONAL EXPERIENCE

Senior Network Delivery Engineer | Claranet Portugal, S.A. January 2021 – Present

Member of the Delivery Engineering team responsible for the planning, design, and implementation of network and security solutions in on-premise and cloud enterprise environments. Preparation of network architectures, technical diagrams, and operational documentation for internal teams and clients. Design and implementation of switching, routing, firewalling, load balancing, and high availability architectures. Specialization in multi-vendor corporate environments: Cisco, Fortinet, Palo Alto Networks, Check Point, and HPE Aruba.

- Design and implementation of switching, routing, firewalling, load balancing, and high availability architectures.
- Specialization in multi-vendor corporate environments: Cisco, Fortinet, Palo Alto Networks, Check Point, and HPE Aruba.
- Tools and Platforms: ServiceNow, Navision, VMware, Hyper-V, Cisco, KEMP, FortiGate, Palo Alto, Check Point, Visual Studio.

Network Administrator | Claranet Portugal, S.A. September 2019 – December 2020

- Advanced technical support for networks and systems for small and medium-sized enterprises.
- Management of connectivity, firewall rules, wireless networks, and server environments.
- Tools and Platforms: ServiceNow, Navision, VMware, Hyper-V, Cisco, KEMP, FortiGate, Palo Alto, Check Point, Visual Studio.

Network and System Administrator | SFGR

December 2015 – September 2019

Global management of network infrastructure for a restaurant group with multiple establishments integrated into central back-office systems. Complete overhaul of IT infrastructure to optimize billing, data reporting, access security, and order processing.

- Administration of internal network infrastructure: Active Directory, FTP, Samba, switching, routing, Wi-Fi, VPN, print servers, and automated backups.
- Development of automation scripts for reporting, data sharing, and maintenance in CentOS and Windows Server environments.
- Tools and Platforms: WatchGuard, Hyper-V, Comserver, OwnCloud, RemoteApp, PHC, SQL Studio, Windows Server, Panda System Management, Linux

IT Heldesk | PCMedic

October 2010 – August 2015

- Technical support for private and business clients across all ISPs in Portugal.

RELEVANT PROJECTS

• Banking Institution in Portugal — SD-WAN Architecture

Design and implementation of SD-WAN architecture consisting of 2 central Hubs and 500 branch offices. Configuration of full redundancy, link monitoring, and dynamic path selection. Integration with ServiceNow, Ansible, AppViewX, CyberArk, and Zabbix.

Technologies: FortiGate, FortiManager, FortiAnalyzer, Ansible, Zabbix, Cisco

• Portuguese News Agency — Datacenter and Headquarters Network and Security

Architecture and implementation of firewall cluster in 2 shared datacenters to protect public servers. Implementation of the headquarters security infrastructure with firewalls, access points, and ZTNA for ~500 users.

Technologies: FortiGate, FortiClient EMS, FortiAP, FortiManager, FortiAnalyzer, Cisco

• Maritime School — National SD-WAN Interconnection

Configuration and installation of complete network infrastructure at headquarters and 13 national branches, featuring centralized logging, virtual appliances, and SD-WAN connectivity.

Technologies: FortiGate, FortiSwitch, FortiManager, FortiAnalyzer

• Public Authority Institution — Headquarters Network and Security Design

Design and configuration of a complete network solution, including firewall, routing, switching, Wi-Fi, network access control, and remote VPN for a public institution with approximately 300 users.

Technologies: Fortigate, FortiNAC, Fortiswitch, FortiAP, Fortimanager.
